RUSH — TIME DATED **ADDRESS CORRECTION REQUESTED**

(Newsbriefs continued)

The Medical Anthropology Program, Department of Epidemiology and International Health, has received three federal grants for training programs, totaling $1,404,693. The grant awards were made to M. Margaret Clark, professor and chair, Medical Anthropology, by the National Institute of Mental Health (NIMH), National Institute on Aging (NIA), and the Administration on Aging.

The one-year Administration on Aging grant is for $104,000 and will be used to continue a multi-disciplinary program in applied gerontology offered to UCSF students. Co-investigator with Clark is Carroll L. Estes, director, Aging Health Policy Center, School of Nursing.

The 5 year NIMH and NIA grants total $364,000 and $471,185, respectively. NIMH funding will provide pre- and post-doctoral fellowships in medical anthropology for an additional five social scientists. The NIA grant will create positions for three new pre- and post-doctoral students.

UCSF is one of four western universities and a health care organization that will take part in a comprehensive three-year project to improve nursing home care through the education and use of geriatric nurse practitioners (GNPs).

UCSF has received a grant of $433,754, part of a $2,752,757 commitment to the project by the W.K. Kellogg Foundation of Battle Creek, Michigan. Also participating are the universities of Washington, Arizona and Colorado and the Mountain States Health Corporation of Boise, Idaho.

The two main components of the project are: recruitment and specialized GNP education of 85 nurses from long-term care facilities in 11 western states, and the development or bolstering of participating universities' GNP certificate programs through workshops, conferences, continuing education, and increased opportunities for GNP and physician preceptorships. For further information contact Barbara Byfield, Continuing Education in Nursing, x1817.

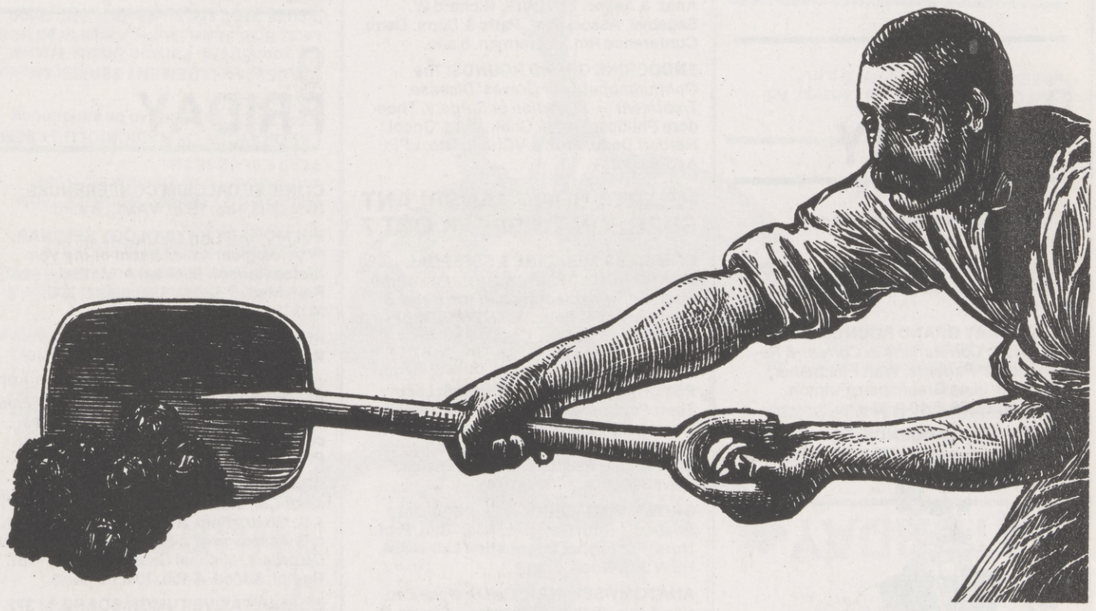
Vol. 7 No. 17, October 3-16, 1981

TODAY & TOMORROW



Moffitt Circle will be closed to both auto and foot traffic on Monday, October 5, and the Emergency Entrance to Moffitt will be moved to the circle on Tuesday, October 6, so that construction crews can extend the third floor of Moffitt over the Emergency entrance. This is part of the Moffitt Modernization – Long Hospital projects.

As of Tuesday morning, all ambulances will be routed to the Moffitt Hospital circle entrance, which will be reserved for ambulances and autos picking up and unloading patients *only*. Five parking meters on Parnassus immediately west of the circle will be reserved for this purpose, and attendants will be on 24-hour duty to help expedite movement of traffic.

This will continue through mid-November, at which time a new, temporary roadway leading into Moffitt Hospital Emergency Room will be opened in the area immediately to the east of the present ER entrance. At that time the Moffitt Hospital circle will be restored to its original use.

During this six-week period, there will be intense congestion of foot traffic and gurneys in the Moffitt Hospital lobby. The campus is asked to utilize other entrances as much as possible, particularly the main entrance to the Medical Science building, and to use the Med Sci elevators (or any other elevators) to get to the upper floors of Moffitt Hospital.

The campus is asked to please bear with this confusion and congestion. It is a difficult, but necessary, construction phase.

NEWS BRIEFS

All staff employees who are members of UC's two retirement plans (UCRS or PERS) will be able to enroll in one of two dental plans — Aetna or Safeguard — during November's open enrollment period.

The Aetna plan emphasizes preventive health care and allows the individual to go to the dentist of his/her choice. The Safeguard plan is a prepaid plan and allows the individual to choose a dentist from a list provided by UC-Systemwide.

It is important for all employees to know that this enrollment is a one-time opportunity. If you do not enroll in November, you will never have the chance again. At present, employer contributions will cover in full all premiums. This may change in the future. Coverage will be effective January 1, 1982. At the time of this writing it has not been decided which dental plan faculty will have.

Copies of the two plans will be mailed to all employees at their homes during the end of October. Included will be a schedule of meetings to discuss open enrollment insurance options. Departments have already received copies of the plans. Employees are encouraged to review these plans carefully. For further information contact the Benefits Section, x1843.
